

## State of War (Tom Clancys Net Force, Book 7)

From the #1 New York Times bestselling creators of Op-Center comes a different kind of law enforcement. In the year 2010, computers are the new superpowers. Those who control them control the world. To enforce the Net Laws, Congress creates the ultimate computer security agency within the FBI: Net Force. Minor viruses are eating away at the Net Force computers. The e-mail shut-downs and flickering monitors are hardly emergencies but they've been keeping the tech department hopping. Same with the sudden rash of time-consuming lawsuits. No one in Net Force has a moment to spare, which is exactly the way Mitchell Townsend Ames wants it. Because when the shadowy mastermind launches his master plan, he wants Net Force to be looking the other way
