

## Deaths Angel Dying

It is 1855 and the allied British & French forces in the Crimea are trying to draw the Russian Bears claws. But with the severe winter weather killing hundreds of men and animals the fighting around Sevastopol has degenerated into a murderous siege. The Allies, very dependent on their navies to bring in supplies, are shocked to learn that the Russians have a new secret weapon that threatens those very lifelines. Captain Peter Kinsley of the 7th Foot, Royal Fusiliers, is sent on a secret mission to the Russian province of Kamchatka to destroy this threat before it can be used with devastating effect against the Allied navies. All involved know that the mission is verging on suicidal. To make their task even more deadly Kinsley knows that there is a spy amongst the expedition intent on making it fail. Yet fail it cannot.
