

Opposites

Six lessons guide two gifted boys in this fantastical tale of learning, sacrifice, and peace. Fadi and Meir discover that time owns the land, ancient wisdom should not cast a shadow over new knowledge, asking question opens minds and creates peace; doctrines close minds and draw boundaries, we are not a reflection of the actions taken by those that came before us, true and lasting peace comes when those at war want harmony more than any others, and most importantly, violence does not solve problems.
