

Communication In The Infantry Division: 1944

The purpose of this manual is to provide suitable plans for the tactical employment of the signal and communication personnel and equipment found in the Infantry Division, in order that signal and communication officers and non-commissioned officers will have a check list or guide in the employment and training of their personnel, and all personnel in the division, especially commanders and staffs, may obtain a more definite concept of the capabilities and limitations of all communication agencies and means, and how certain of these supplement each other. The infantry division, division signal company, infantry regiment, division artillery, engineer battalion, and cavalry reconnaissance troop, mechanized, are described. Perfect classic WWII military radio comms book for military historians and amateur radio operators. Ham radio operators can learn valuable but long forgotten radio techniques.
