

Taxidermy: concepts and techniques - Vol. 2 Mammals

The purpose of this second volume is to bring down the very closed mentality of some embalmers, with respect to professional secrecy and to the peaceful dialogue between the taxidermists. The hope is that with my e-book you can uncover new techniques of preparation of the animals, even those techniques discovered by chance, every taxidermist, or to overcome certain difficulties. My experience with regard to the preparation of mammals is up to the size of a fox or a little bigger. Also because I do not have a suitable laboratory for preparation of large size animals. Attached to the writing of this book, there are 27 movies for a total duration of 136 minutes. I remember that, to display images related to some mammals, you can visit my site: www.naturaearte.altervista.org
