

The Journal Of A Survivor.

In a devastated future Australia one man is trying to provide a solid future for his family on a country property to which they have fled after leaving Brisbane. This is his journal, a record of the life of the community they have become a part of, the work they are doing to try and rebuild some semblance of society again, and revelations that he discovers slowly about the fate of the rest of the country and, eventually, the wider world. It records his travels, his scouting missions to the deserted husk of the once-bustling city of Brisbane, and those he encounters along the way. It tells the highs, the lows, and the dangers his family faces as they try to adjust to this new way of life in a world that has changed in sometimes-frightening ways he couldnt have imagined.
