

Abode of Snow: Observations on a Journey from Chinese Tibet to the Indian Caucasus Through the Upper Valley of the Himalaya (Exotic travel)

In the year 1873 the author traveled through one of the most inhospitable, but beautiful mountain ranges in the world, the mighty Himalayas. For six months Wilson made his way through these unforgiving mountains, struggling against the elements, desperate to buy provisions from a suspicious native populace, and always trying to fight off the unrelenting cold. During portions of this epic journey Wilson rode a native Spiti pony. His descriptions of how this trusty mare saved her riders life by clambering over boulders and threading her way along sheer cliffs makes for thrilling reading. The lowest pass they crossed was the 11,578 foot high Zoji-la. Alternately an adventure tale full of murderers and rogues, The Abode of Snow is also strewn with poetic passages regarding Wilsons observations of the natural beauties he traveled through, including glacier flowers and snowy peaks. The book remains one of the best accounts of overland equestrian travel ever written about the wild lands that lie between Tibet and Afghanistan.
