

The Pepper Jones Collection

Praise for the Pepper Jones series: Ali Dean is Incredible! This is one of my all time favorite sports YA series. If you havent read it yet, you are missing out. It is worth the purchase. You will read and reread again and again. - Traci Ganuza (Amazon and Goodreads reviewer) I absolutely loved this book. Everything about it. Its dripping with angst, has strong characters, an edge of your seat romance, and a fabulous running subplot. -Theresa Hernandez on Pepped Up (Adventures in Writing Blog) Ali Dean definitely knows how to write a good series. From the first time I read about Pepper Jones (yes Ive reread) I fell in love with these characters and the places they will go. I cant wait to see how far Ali takes this. - Meagan Hunt (Bedknobs and Book Babes Blog) This author is clearly a very talented writer. Her writing is smooth, and her characterizations are vivid and three dimensional. Pepper is a dynamic, extremely sympathetic heroine. I enjoyed the use of first-person point of view, and I found the window into Peppers running world fascinating. - Kate McMurry on Pepped Up (Amazon top reviewer) The Pepper Jones collection includes the first three books in the coming of age series that has readers of all ages hooked. If you havent already fallen in love with Pepper Jones and the cast of characters in Brockton, Colorado, nows your chance to read the three books about her high school years before she starts college in the fourth book, Pep Talks.
