

## The Wandering Tree

Poverty has a way of stripping childhood of its dignity, a fact of life that Lincoln Chase knows all too well. Wearing thrift store clothes, praying to the gods of adolescence that some loud-mouthed kid doesn't recognize his old shirt. Building up firewood reserves while other boys are out popping fly balls without a care in the world. It's a relentless condition without a single redeeming quality. Of course, being poor is something that Lincoln has had time to accept. That his father is a convicted murderer, on the other hand... well, that's a fresh wound that'll take some getting used to. And soon enough it'll be the least of his problems. Yet all is not lost. Because in a long neglected hayfield, something extraordinary is happening something so contrary to human thinking that the rules of possibility begin to unravel. And for a boy like Lincoln, it doesn't merely change the way he sees the world. It changes everything.
