

Tin Tales

When postulating on the styles and customs of the Victorian era through this title, you actually view the past on a thin immortalized sheet of iron, which is exceptionally inspiring. The joys, happiness, struggles or woes of the era as well as the oddities are deftly captured in these photos. On first glance, without the back-stories, typically inaccurate imaginings come to mind - the truth of the matter tends to be a shocker. These subjects of some of the earliest photographs generally fail to smile. Whether these folks were happy or sad is a guess without the stories accompanying each artistic rendering. What was the Victorians' obsession with capturing the dead in a photograph? Could there be a darker, hidden aspect to this prim, proper and orderly society? **TIN TALES**, answers this question and more through an array of Gothic Horror short stories, which accompany each ferrotype photograph at the onset of every chapter. These are accompanied by quotes from the infamous Edgar Allan Poe. Readers are in awe over Author Bill (Dr. Bill) Moorefield's ability to weave them through a series of surprisingly macabre short stories well-doused in romanticism and sensuality among the twilight zone or surreal potentialities of life behind the ferrotype image.
